The WHO also estimates that there are 0.02 million people who are severely visually impaired in the world. This is a significant increase from the 0.01 million people who were severely visually impaired in 1990.

The WHO also estimates that there are 0.01 million people who are totally blind in the world. This is a significant increase from the 0.005 million people who were totally blind in 1990.

# SIZE

\* Seat height range with inclination.

### Adjustable Headrest

Our manually adjustable headrest is like the icing on your relaxation cake. Adjust to find the right angle to support your neck when you're watching a movie, reading a book, or just resting.

### Adjustable Footrest

Put your feet up with the smooth footrest mechanism. The innovative design folds under the seat, maintaining the contemporary aesthetic.

### Remote Control

Easy to use and highly functional, the remote control fits seamlessly into the recliner. Here you can control all three motors to achieve your ideal position.

### Adjustable Backrest

The internal frame of the backrest is constructed to withstand significant weight and pressure. Guaranteed to provide all the strength and support you need.

### Convenient Charging Point

Designed for optimum convenience, the charging point is located on the back of your recliner for easy access.

### Wide headrest

We all need a little extra support sometimes. Here, it's the safe presence of the extended headrest; more space for you to lean into and get comfy.

### Turning Base

Our sturdy, metal turning base has an automatic stopping function after 270° of rotation. This prevents the wires inside from getting twisted, pulled out or damaged.
